

retreating Experiments starting from an **initial glacier surface**,
with regularisation parameters $\lambda_0 = 1$ and $\lambda_1 = 100$

fg: first guess
— and A: at once approach
— and B: calculated approach
— and C: separated approach

—●— RMSE of b and b_t
- -●- - RMSE of s_m^e and s_o^e
...●... RMSE of Ps and Ps_t
